- Hold both utility and design patents

INGENIO™ Connectivity Companion Kits

Why stop at connectivity when you can deliver the full experience?

When upgrading to advanced high-speed data systems like Starlink, Gogo, or JetWave, consider to offer your clients more than just internet. INGENIO Aerospace empowers you to upgrade their entire connectivity experience.

As a leader in personal electronic device (PED) power and passenger interface technology, INGENIO offers an array of products designed to seamlessly complement these connectivity upgrades with a curated selection of power, mounting, and comfort accessories that elevate the physical inflight experience without adding significant installation time.

Install Once. Upgrade the Entire Experience.

INGENIO's Connectivity Companion Kits transforms a simple connectivity installation into a fully enhanced cabin experience. Whether your client is a tech-forward charter operator or a discerning private owner, this package delivers comfort, utility, and modern elegance at every seat.

Four Compelling Reasons

To Integrate the Companion Kits into Your Connectivity Installations

1 Future-Proofing

Keep cabins current with modular, tech-forward accessories that evolve with PED standards

Passenger Delight

2

Offer visible, physical, and tangible enhancements that customers can immediately see, touch, and appreciate

3 Turnkey Integration

Installation time aligns seamlessly with Starlink, JetWave, or Gogo systems, making it an ideal add-on

Cost Effectiveness

4

Get maximum value with our modular discounted connectivity kits, it keeps costs low and flexibility high
